ON PREMISE SOFTWARE

Script Name:

User To-Do List

Script Type:

Email

Overview

This script is designed to simply provide an email version of the managers to-do list i.e., if there are 28 unauthorised absences on the to-do list, it will email the manager telling them there are 28 unauthorised absences.

Dependencies

No dependencies
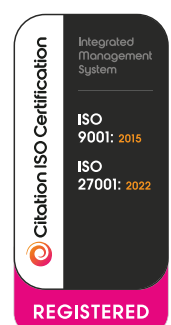

Operation Example

- 9am on a Monday morning, manager will receive an email with his to-do list contents.

Configuration

- Configured as an email script via the Event Handler. To be ran as often as the customer requires.
