What is a Referral Partner

A Referral Partner is an individual or business that earns a commission by referring potential customers to timeware®. The Referral Partner is responsible only for introducing leads—timeware® handles the rest, including the sales process, demonstrations, quotations, and customer support.

Key Terms:

- Commission: 15% of the sale, paid when timeware® receives the final payment from the customer.
- No Fees: Referral Partners do not need to pay any fees to timeware®.
- Agreement & Renewal: The partnership agreement and price lists are renewed annually.
- Commission Terms: Each partner receives a formal agreement outlining their commission rate and payment terms.

This setup allows Referral Partners to benefit financially without being involved in the sales or support process.

Referral Partner Engagement & Product Updates

At timeware®, we believe it is essential for all partners to stay informed about our product growth and advancements. To support this, we provide ongoing updates and engagement opportunities for our Referral Partners.

Onboarding & Training

- Upon signing up, Referral Partners will have an initial meeting with key members of the timeware® team.
- This session includes product awareness training to ensure partners fully understand our solutions and value proposition.

Ongoing Updates & Communication

- Regular Microsoft Teams meetings will be scheduled to keep partners up to date with the latest product developments.
- Partners will receive our quarterly newsletter, The Insider, featuring important updates, insights, and industry news.

This commitment to training and communication ensures Referral Partners are always equipped with the latest information, enabling them to introduce leads effectively.

timeware®
Workforce Management Systems

Introducing timeware®

For more than 40 years, timeware® has been helping organisations improve the way they manage their workforce.

Based in the UK, our team combines decades of workforce management experience with the latest cloud technology to deliver secure, reliable and innovative solutions.

timeware® HRMS is our next generation Workforce Intelligence Platform, bringing together HR, leave management, advanced time management and roll call within one powerful cloud solution.

From onboarding and employee records through to complex working patterns, absence management, overtime authorisation and real-time workforce visibility, timeware® HRMS gives organisations the information they need to make better decisions, improve productivity and remain compliant.

Our experienced Implementation Team works closely with every customer to understand their requirements, configure the solution and support a successful rollout.

And our involvement does not end when the system goes live. We provide training, ongoing support and a comprehensive managed service designed to build long-term relationships with our customers.

Built on decades of experience and developed for the future of workforce management, timeware® HRMS gives organisations greater visibility, greater control and greater confidence in their workforce.

Overview

timeware® HR, Time and Attendance Software offers a powerful suite of modules to streamline your company's workforce management.

Personnel Module

The personnel module stores detailed employee information, integrating with your existing HR system.

Absence Management

The absence management module tracks authorised and unauthorised leave, highlights trends and anomalies, and ensures correct holiday entitlements.

Attendance Module

Central to timeware® is the highly customisable attendance module. It supports various work patterns, including standard shifts, flexitime, continental shifts, and annualised hours, and processes hours via the ESS GO mobile app. Customisation ensures accurate calculation of basic and overtime hours, tailored to your business needs.

Cost Centre Analysis

Manage different pay rates for various departments effectively with the cost centre analysis module.

Access Control

Implement robust physical access control by connecting to approved devices, allowing managers to control access based on security levels.

Fire Alarm Monitor/Assembly Point

Ensure quick and accurate roll calls during emergencies by linking the fire alarm monitor/assembly point module to your fire alarm system and muster point devices.

Dashboard and Reporting

Quickly access and analyse data with the dashboard and report module, offering Excel integration.

Suprema Integration

As an approved Suprema Integration Partner, timeware® UK Ltd provides advanced solutions, including proximity, fingerprint, and face authentication technologies.

Integrations

timeware's primary USP is its ability to integrate with other applications, for example a Payroll, HR or Security system. timeware® or the third party software becomes the 'primary' system passing data to the 'secondary'. A well planned integration enables a business to improve workflow and increase efficiency.

Our integrations include:
