Sage Payroll Integration datasheet

Development Partner

Overview

Integrating with Sage Payroll eliminates the need to enter employee details into both software systems and also eliminates the need to enter employee hours worked into Sage.

Sage Payroll

Sage Payroll is a payroll software product offering by Sage for small to medium sized businesses. Many UK businesses use Sage Payroll to manage payroll processes including payslips, employee pay, pensions, expenses, statutory pay, tax calculations and HMRC submissions.

timeware®

timeware® is a Sage Development Partner and has developed an integration that following overtime approval, allows the total hours worked data held in timeware® to be transferred to Sage Payroll eliminating manual data entry.

Annual licence

The Sage Payroll integration is enabled by an annual licence.
